VOLUME OF TRADE LARGE IN PRINCIPAL COUNTRIES

Even Great Britain Not Cast Down by the Coal Strike; New York Financiers Have Faith in the Future.

T EW YORK, March 2.-A lot of sand keeps the world's business machinery from running smoothly. Nearly every nation is suffering. In it the machinery is moving at gratifying rate. Trade is not of poor volume in the prin-

Trade is not of poor volume in the principal countries. Britain, in face of a strike of unparalleled gravity, has done remarkably well until last week. In Germany industries have been active, though the withdrawal of foreign tunds last fall is now bringing on a too large number of fallures and commerce is compelled to pay oncrous rates for accommodation, france is cheerful; the hourse is restrained more by the depressing influences abroad than any lack of confidence at home.

Even in the United States less complaint is heard concerning the extent of the turnover than about the margin of profit. The consumer will not put on crope over this, for he may be pardoned for feeling that profit margins in the past have been unduly generous.

Speculators Optimistic.

Financial gentiment, as reflected by the prices paid for stocks on the New York stock exchange, has become distinctly brighter. Quotations are now at the maximum for the year—a wonderful exhibition when the picthera of political, legal, economic and labor disturbances is con-

bitton when the plethora of political, legal, economic and labor disturbances is considered. But Wall street is mercurial; next week it way be in the doldrums without any new reason.

Anyone who hus read these weekly articles may recall that heretofore a serious view has been taken of the British coal strike. Such a stand, it must be admitted, is justified.

On mature deliberation I am now going on record as looking for speedy settlement on terms not wholly onesided. Bluntly, I think the miners have overshot the mark and that before many days pass numbers of them will quietly return to work pending the preparation of a new pact.

The darkest cloud is oft before the dawn. The situation throughout Great of Co Britain has been a blot on twentieth century civilization. Whether the government or the mines owners or the miners are chiefly to blame I am not in a position less connected to state. "Circumstances" have been connected to state.

By B. C. Forbes. chiefly responsible. But when a position becomes utterly impossible, then something must happen.

The "something," I am optimistic enough to believe, will not be the crack of industrial doom, but a truce on terms not fatally injurious to the producers.

Situation Over Here.

Anthracite and bituminous miners throughout the United States are pre-paring for war. But no repetition of the horrible happenings in England is prob-able.

The chances now are that, failing an

prices and the cleaning up of surplus stocks.

Moreover such a course would help to bring both sides to a concillatory frame of mind and thus facilitate a give and take settlement. The mine owners seem to have done better than the men during the existence of the contract now about to expire, although it must not be imagined that the miners have been in misery. They haven't.

Rumors are affoat that high politics will be played in handling the situation. Any attempt of this kind would be most deplorable and should be resented by all parties, particularly the public. Incidentally those of up who are neither mine owners nor miners should not forget, in throwing in our sympathies with one side.

tally those of us who are neither mine owners nor miners should not forget, in throwing in our sympathies with one side or the other, that if wages are materially advanced, we, not the producers, will have to foot the bill.

Stocks were quiet but firm throughout the short session today. The final quotations were not materially changed from those of yesterday. Standard Oil stock was reactionary. The Steel trust announced an increase of orders on its books of 74.479 tons for the month of February. The bank statement showed a decrease of surplus reserves of \$4.632, 450. Lehigh Valley and Soo shares were active on the advance late in the day.

Suspension of the stock exchange firm of Connor & Co., and had no influence on the market, as the firm had no market commitments, having been in Iduidation for more than a year because of the hopeless illness of its senior partner, E. S. Connor.

I AM FOR MEN No Incurable Cases Accepted Reasonable Prices uick and Lasting Cures, ree Advice on Marriage.

SENTIMENT IN EAST IS QUITE OPTIMISTIC

James A. Pollock & Co., bankers and brokers, furnish the following, received wer their private wire yesterday after-

Paine, Webber & Co., Boston-Following the weakness in London the markets here opened quiet and slightly weaker. There was good buying, however, after the first few minutes and the close was generally firm. There has been considerable liquidation in the coppers for the past few days and we believe the market is in a healthler condition for a much further advance than at any time in the present move, and still believe the good coppers can be bought for good profits.

Logan & Bryan, New York-Today's market showed a very good undertone, the principal feature being the advance in Lehigh Valley and American Can issues. The buying in Lehigh seems to be good and looks as if it were for inside interests. The industrials, particularly the coppers, are displaying strength from day to day, and it must be acknowledged that the improvement in the metal situation is gaining ground, and, with the change in sentiment for the better, we believe this is a good fundamental basis for higher prices throughout the list later on. The bank statement loday was without any particular feature. Paine, Webber & Co., Boston-Follow

Not Sick, Yet Hardly

Able to Work

"Weakness" is the cause of more sorrow and suffering than all other allments combined. I see the victims of this disorder on every hand, his whole appearance proclaiming to all the world his trouble and tending to blight his existence. My treatment cures disordered men by overcoming and removing the effects of disorders. It stops all waste and quickly restores the victim to what nature intended—a healthy and vigorous man, with all his functions and power complete.

RHEUMATISM **Cured Without** Drugs

You can't oure rhoumatism with drugs. There's no use trying. Drugs, or rather poisons, will stop the pain for a while by stupefying the nerves, but that does not remove the cause, so the pain comes

You know that rheumatism is caused by uric acid in the blood. There's only one thing that can get at this urle acid and drive it out of your system. That's electricity. It sosks into every vein and tissue of the body and drives the polsonous acid through the circulation, back to the kidneys, which filter the blood of all

Our Electra-Vita has cured the worst cases of rheumatism after drugs and other methods had falled. When electricity goes in the body rheumatism must go out. There's a whole lot to know about applying electricity so that it will

cure. We have spent a good many years learning how to use it suc-cessfully, and we will give you the benefit of our knowledge. Electra-Vita is a scientific device for infusing the body with a sready, unbroken current of electric life, for hours at a time, without the least shock or unpleasant sensation. Its power comes from dry batteries, so there is no charging to do, no bother of any kind. All that is necessary is to adjust it correctly and turn on the power to the proper

degree of strength.

Electra-Vita is so constructed that the full force of current can ne applied to any part of the body while you sleep.

No pain can exist in a body charged with electric life. You can have no rheumatism, no weakness, no inactive parts, because the life generated by this grand force gives health and strength to every organ.

DR. C. C. SANDEN, Co., 1151 Broadway, New York, N. Y. Dear Sirs-Please forward me your Book, as advertised, free

Are You a Perfect Man?

WITH NO BACK PAINS NO NERVOUSNESS NO WASTE OF TISSUES NO LOSS OF AMBITION

But With Plenty of Life, Energy and Vigor of Youth wasting the vitality and strength which nature gives them. Instead of developing into the strong, vigorous young fellows that nature intended them to be, they find themselves despondent—no ambition to do anything. They struggle aimlessly along, sooner or later to become victims of that dread disease, nor-vous debility; their finer sensibilities blunted and their nerves shattered.
